DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-26 drawn to computer supported collaborative work between users, classified in class 715, subclass 751.
- II. Claims 27-32, drawn to computer and user authentication, classified in class 713, subclass 155.
- III. Claims 33-40, drawn to computer network and resource administration, classified in class 709, subclass 223.

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, such as the reception of group information and creating a website structure instantiation, and may be performed separately from the other inventions. Invention II implements the existence of user-permission levels and a tiered access scheme, which also may be implemented separately. Invention III is directed to the access of administrator datasets, which is drawn to network resource management, and also has separate utility.

Art Unit: 2145

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
